## DETAILED ACTION

### *Drawings*

1. The drawings were received on 15 December 2005. These drawings are accepted.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-3, 6-11, 16-19, 35, 36, 38 and 39, as broadly claimed, are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Boyd US006626743B1, as set forth in the previous Office action.
4. The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

### ***Claim Rejections - 35 USC § 103***

5. Applicant's response has overcome the previous rejection under 35 USC 103.

Art Unit: 3723

6. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

7. Claims 1, 5-25, 29, 30, 32-35, and 37-42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pant, '536 in view of Cothrell et al, '955. '536 discloses the claimed invention, including a conditioner for the polishing pad, disclosing that conditioners are known, but does not disclose the type of conditioner used. '955, in an abrasive tool device, teaches a conditioning head comprising an input capable of delivering a fluid, and an output adjacent the input capable of removing at least part of the fluid delivered by a fluid delivery device. It would have been obvious to one of ordinary skill to have provided '536 with the conditioner taught by '955, column 5, lines 5 through column 6, lines 28, to condition the polishing pad and to remove spent abrasive and debris, preventing damage to the workpiece. Note that '536 disclose a computer capable of controlling all parts of the CMP apparatus, including a conditioner. Note that Pant discloses an inductive sensor, a computer, the computer in communication with the inductive sensor, the sensor capable of detecting topography height variations, (in changes in the gap between the platen and linear pad), the computer capable of providing control over the operation of the head.

***Allowable Subject Matter***

8. Claims 4, 26-28 and 31 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The following is a statement of reasons for the indication of allowable subject matter: The prior art of record does not

teach multiple heads with the structure claimed, mounting the head on a robotic arm, or the head fluid being an abrasive free chemically inert liquid or deionized water, or a combination thereof.

### ***Response to Arguments***

9. Applicant's arguments with respect to claims 1-42 have been considered but are moot in view of the new ground(s) of rejection (Claims 1, 5-25, 29, 30, 32-35, and 37-42, under 35 U.S.C. 103(a) as being unpatentable over Pant, '536 in view of Cothrell et al, '955). Applicant's amendment has overcome the rejection under 35 USC 102 over Cothrell et al, '955.

10. Applicant has not overcome the rejection of the claims under 35 USC 102(e) over Boyd '743. Please refer to MPEP 2136.05 and 706.02 for the methods to overcome the rejection. Applicant must either persuasively argue the patentability of the claimed invention over '743; amend the claims to be patentably distinguished over '743; file an affidavit or declaration under 37 CFR 132 showing that the reference invention is not by "another.". While a statement that the prior art was owned by the same assignee as the pending invention can be used to overcome a rejection under 35 USC 103, it does not suffice to overcome the rejection under 35 USC 102(e). Further, regarding claims 1-3, 6-11, 16-19, 35, 36, 38 and 39, applicant has claimed that the head is **capable** of being positioned between a fluid delivery device and a wafer carrier. There is nothing in the structure of '743 that would prevent the head of '743 to be positioned as claimed. It is certainly **capable** of being positioned anywhere on the polishing surface.

***Conclusion***

11. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

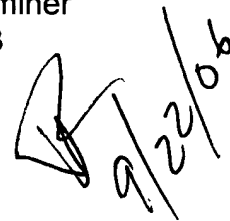

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
